Date of Action: September 14, 2021

SEQR Status: Unlisted

Description of Action: Walden Construction Enterprises LLC has requested that the Agency consider undertaking a project (the "Project") for the benefit of the Company, said Project consisting of the following: (A) (1) the acquisition of an interest in an approximately 6.2 acre parcel of land located at 120 and 126 North Montgomery Street in the Village of Walden, Town of Montgomery, Orange County, New York (tax map nos. 302-1-5.1 and 302-1-6) (collectively the "Land"), (2) the construction on the Land of an approximately 99,075 square foot senior citizen (age 55+) market rate rental housing building with sixty-nine (69) dwelling units and amenities and the reconstruction and the improvement of an approximately 1,040 square foot existing building to be used as an office for the senior housing building and an existing garage to be used as a maintenance shed all with related site work and exterior improvements (collectively, the "Facility") and (3) the acquisition and installation therein and thereon of related fixtures, machinery, equipment and other personal property (the "Equipment"), all of the foregoing to constitute a market rate senior rental housing facility (the Land, the Facility, and the Equipment being collectively referred to as the "Project Facility"); (B) the granting of certain "financial assistance" (within the meaning of Section 854(14) of the Act) with respect to the foregoing, including potential exemptions from certain sales and use taxes, real property taxes, real property transfer taxes and mortgage recording taxes (collectively, the "Financial Assistance"); and (C) the lease (with an obligation to purchase) or sale of the Project Facility to the Company or such other person as may be designated by the Company and agreed upon by the Agency.

Tax Map Parcel # 302-1-5.1 & 6

Reasons Supporting this Determination:

The Town of Montgomery Industrial Development Agency (the "Agency") went over Part 2 of the Environmental Assessment Form for the Project, a copy of which is attached hereto. No questions on Part 2 of the Environmental Assessment Form identified an impact identified as potentially moderate to large. However, where there is a need to explain why a particular element of the proposed action will not result in a significant adverse environmental impact, the Agency required a Part 3 evaluation of the magnitude and importance of the proposed action's impacts.

Impact on Land: The proposed action may result in increased erosion from physical disturbance or vegetation removal. Although the proposed action includes the construction of approximately 3 acres of impervious surfaces (e.g., building, parking lot), runoff will be controlled with a Stormwater Pollution Prevention Plan (SWPPP), consistent with NYS Department of Environmental Conservation ("DEC") requirements, including preparation of an erosion and sediment control plan. As a result, and based upon the Applicant's compliance with the SWPPP, no significant adverse impacts to land are anticipated.

Impact on Groundwater: The proposed action will connect to an existing public water supply and existing public wastewater treatment system that have adequate capacity for the proposed uses. As a result, no significant adverse impacts to groundwater are anticipated.

Impacts on Plants and Animals: The DEC EAF Mapper did not identify any species of plant or animal listed by New York State or the Federal government as threatened or endangered, any areas identified as habitat for an endangered or threatened species, or any species of plant or animal that is listed by New York State as rare or a species of special concern on the project site. As a result, no significant adverse impacts to plants and animals are anticipated.

Impact on Historic & Archeological Resources: The proposed action may occur wholly or partially within, or substantially contiguous to, any buildings, archaeological site or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places. Additionally, the proposed action may occur wholly or partially within, or substantially contiguous to, an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory. The property located at 73 North Montgomery Street contains a house that is eligible for listing on the National Register/State Register of Historic Places. The project site is located on the other side of North Montgomery Street and the proposed buildings will be set back on the property and screened by landscaping and existing buildings in the area. Additionally, the Village of Walden Planning Board Negative Declaration indicates that the NYS Office of Parks, Recreation and Historic Preservation has determined that the project will not have any adverse impacts on archeological resources. As a result, no significant adverse impacts to historic or archeological resources are anticipated.

Impact on Transportation: The project does not exceed the thresholds for significant traffic increases set forth in the DEC Full EAF Workbook for apartments or offices. Additionally, the Applicant has submitted a Traffic Report that found the project is not anticipated to have a substantial impact on the existing traffic patterns along NYS Route 52. As discussed in the Traffic Report, the trip generation rates for senior housing do not typically coincide with the peak hour of adjacent street traffic, and the trip generation for the proposed office/maintenance building is consistent to that of the single-family dwelling that exist on the site. As a result, no significant adverse impacts on transportation are anticipated.

Impact on Noise, Odor and Light: The proposed action may produce sound above noise levels established by local regulation. Additionally, the proposed action may result in light shining onto adjoining properties. The increased noise levels are temporary and are only expected to occur during construction. The proposed

action will have outdoor lighting, but all fixtures will be downward facing and properly shielded to reduce spillover to neighboring properties. Additionally, the Applicant will maintain an existing landscaping buffer and has proposed additional landscape screening. As a result, no significant adverse environmental impacts to these resources are anticipated.

Consistency with Community Plans: The Village of Walden amended certain zoning regulations to accommodate the project and a side yard area variance was obtained from the Village of Walden Zoning Board of Appeals to allow the Applicant to change the use of an existing garage to a maintenance shed. The proposed action is therefore consistent with all applicable zoning regulations.

The Town of Montgomery Industrial Development Agency finds that the proposed action will not result in any significant adverse environmental impacts by its approval, and therefore no further environmental review is necessary.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project: Walden Construction Enterprise LLC
 Date: _____

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

See attached Negative Declaration.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Town of Montgomery Industrial Development Agency _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
